Spyce: El php dels pythers ;-)

(6410 lectures)

Per **Carlos Cortes Cortes**, [carcoco](http://bulma.net/~carcoco/) (<http://bulma.net/~carcoco/>)

Creado el 06/07/2002 10:46 modificado el 06/07/2002 10:46

Segur que tots coneixeu **PHP**, llavors **Spyce** es com el php pero utilitza el llenguatge **python** ...

"SPYCE is a drop-in Apache plugin that supports simple and efficient Python-based dynamic HTML scripting. Those who like Python and are familiar with JSP, or PHP, or ASP, should have a look at this engine. It allows one to generate dynamic HTML content just as easily, using Python for the dynamic parts. Its modular design makes it very flexible and extensible. It can also be used as a command-line utility for HTML pre-processing, and via CGI on any server."
