WineX 2.1: Ejecuta Warcraft III y en linux (36260 lectures)

Per **Carlos Cortes Cortes**, [carcoco](http://bulma.net/~carcoco/) (<http://bulma.net/~carcoco/>)

Creado el 02/08/2002 23:29 modificado el 02/08/2002 23:29

TransGaming acaba de publicar la versión 2.1 de **Winex**, una versión modificada y propietaria de **Wine** enfocada en la ejecución de juegos **windows** bajo sistemas **linux** (y otros sistemas: PlayStation 2, Apple Mac OS X, set-top boxes, PDAs), que permite jugar a las últimas novedades del mercado: **Warcraft III**, **Civilization 3**, **Grand Theft Auto 3** y **Black & White ...**

Esta nueva versión **2.1** ha supuesto un gran salto cualitativo en el producto, de forma que permite la ejecución directa de la versión de windows del **Warcraft III** en sistemas linux. Según parece, cerca de 3 millones de personas en todo el mundo han *obtenido* esta nueva entrega de uno de los mejores y más adictivos juegos de estrategia ;-)

"The defining enhancement of WineX 2.1 enables recently released hit games such as Blizzard's Warcraft III: Reign of Chaos to run seamlessly, out of the box, on Linux."

Las principales novedades de esta nueva versión son:

- Support for WarCraft III in OpenGL mode
- Support for Civilization III, version 1.0 and 1.07. Version 1.21 is not yet supported due to copy protection issues.
- Support for Black and White.
- Support for Grand Theft Auto 3.
- Fixes to DXGrab and XVIDMode code to better support full-screen modes
- Various improvements to DirectSound and Wave audio
- Better support for DirectX version detection.
- Improved keyboard focus support for some games.
- Faster copy protection code. In some cases, copy protection wait times have been reduced by more than 50%. Other cases remain slow, however. For users of Panasonic DVD drives, be aware that a previous Panasonic-specific workaround has been removed from WineX 2.1 after testing revealed that did not appear to be necessary on recent 2.4 series Linux kernel releases.

TransGaming Technologies:

<http://www.transgaming.com/>⁽¹⁾

WineX es el principal producto de **TransGaming**, por lo que si queremos una versión compilada y empaquetada lista para utilizar tendremos que pasar por caja y abonar el importe de este excelente programa, aunque también podemos obtener del **CVS** el código fuente y compilarlo por nosotros mismos. **Atención**, parece ser que la versión disponible en el repositorio [CVS](#)⁽²⁾ de **SourceForge**, no esta actualizado a la última versión :(, sino que va muy retrasado.

```
cat VERSION
ReWind version 20020228
```

¿Alguien sabe de algún servidor **CVS** donde obtener el código fuente de la nueva versión **WineX 2.1**?
